

Staff Engineer II
Location: Torrance, CA

About the Company

Davenport Engineering, Inc., an environmental engineering firm based in Torrance, California, provides both specialized consulting and on-site services to the petroleum, chemical manufacturing, food and plastic industries. Our company maintains a reputation for having hands-on, hard working principal and staff engineers, and for developing high performing, well rounded employees. For additional information about the company, please visit our website at www.davenport-co.com.

About the Position

An opening exists for a Staff Engineer II, in our Torrance location, with hands-on experience to manage projects for both existing and new target industry clients. The position includes working on a variety of challenging environmental compliance, permitting, auditing, emission, and hazardous chemical inventory projects for clients located primarily in the western states and gulf coast. Candidates must demonstrate ability to review and understand complex environmental regulations related to one or more of these areas.

Qualifications

Candidates should have a B.S. in Chemical Engineering, Environmental Science, Chemistry, or related discipline, and 2+ years of related work experience. Individuals who are self-motivated, detail oriented, and thrive in a fast paced team environment are well suited for this position. Strong written and oral communication skills are essential.

Ideal candidates will have consulting and project management experience, exposure to petroleum and/or chemical manufacturing, and a background in one or more new target industries.
